

Multiplication Word Problems

Name: _____

Write and solve a multiplication equation for each problem:

1. If you plant 3 rows of carrots with 4 carrots in each row, how many carrots will you have in total? $\square \times \square = \square$
2. If you buy 4 bunches of broccoli and each bunch has 5 stalks, how many stalks of broccoli do you have? $\square \times \square = \square$
3. If you have 5 cartons of tomatoes and each carton has 6 tomatoes, how many tomatoes do you have in total? $\square \times \square = \square$
4. If you have 6 packages of spinach and each package has 7 ounces, how many ounces of spinach do you have in total? $\square \times \square = \square$
5. If you have 8 sets of corn and each set has 9 ears, how many ears of corn do you have in total? $\square \times \square = \square$
6. If you have 9 packages of green beans and each package has 10 ounces, how many ounces of green beans do you have in total? $\square \times \square = \square$
7. If you have 10 bags of potatoes and each bag has 11 potatoes, how many potatoes do you have in total? $\square \times \square = \square$
8. If you have 11 heads of lettuce and each head has 12 leaves, how many leaves of lettuce do you have in total? $\square \times \square = \square$
9. If you have 12 packages of mushrooms and each package has 13 mushrooms, how many mushrooms do you have in total? $\square \times \square = \square$
10. If you have 13 jars of pickles and each jar has 14 pickles, how many pickles do you have in total? $\square \times \square = \square$
